

Representative [Dave Loeb sack](#) visited the [Clear Creek Watershed](#) 5-11-17. We started the tour at [Kent Park](#) where Brad Freidhof, Conservation Program Manager gave us all an update on the goings on with Kent Lake and upstream catch basins. We then went to the [City of Coralville](#) where Dan Holderness, City Engineer; Amy Foster, Stormwater Coordinator and Teresa Stadlemann, [HR Green](#) Engineer all gave great presentations about the new flood protections and the bioretention cell (modified raingarden) between the parking lots.
